TOTAL	**£2,143.32**

1. Payment Terms

- **Net Terms:** All UK customers: **strictly 30 days** net from invoice date.
- **New Accounts:** First order by Pro-Forma Invoice; thereafter, should a credit account be approved, standard terms apply.
- **VAT:** Charged at the rate ruling on the day of despatch. Export orders must supply proof of export and material receipt; failure to do so will incur UK VAT.

2. Quotation & Pricing

- **Validity:** All quotations valid for **48 hours** from the quote date (unless stated otherwise).
- **Material Availability:** Prices based on current stock; subject to prior sale.
- **Quantity Basis:** Quotes assume the total quantities specified; changes may require a requote.
- **Quotation Basis:** Quotations are based solely on the information and specifications provided in the RFQ pack; any requirements or specifications not included will be quoted as standard material and processes.
- **Requote Rights:** We reserve the right to requote if supplier prices change or order quantities differ.

3. Carriage

- Unless carriage costs are explicitly stated or agreed beforehand, all goods are **Ex-Works** (collection from our premises).
- Delivery can be made to anywhere in the UK, if export is required this is to be arranged by yourselves.

4. Lead Times

- Subject to plant capacity at time of ordering. Estimated delivery dates are accurate when quoted -please reconfirm at order placement. Lead time subject to account status during execution of the order.

5. Minimum Order Charges

- A minimum order charge applies to all processes.

6. Conditions of Sale

This contract is governed by our **Conditions of Sale**, available on request or via: www.impressltd.co.uk/downloads

7. Standard Tolerances / Notes / Qualifications

Unless tighter tolerances are specified on enquiry, the following apply:

Laser Cutting & Machining	± 0.25 mm
Bending / Forming / Pressing	± 0.5 mm and ± 2°
Welding / Fabrication	≤ 1 000 mm: ± 1.5 mm > 1 000 mm: ± 3 mm
Flatness (Laser-Cut Parts)	During the laser cutting process, heat is generated and stress in the material is released as components are cut from the raw material. Material is visually checked during the goods in process for commercial flatness tolerance. Should you require a flatnes s tolerance greater than the commercial standard offered by our material suppliers, this must be stipulated and requested at quotation stage so that additional operations needed to achieve the flatness tolerance can be costed for. Please note that commercial flatness varies by thickness and grade. Long components with thin widths are likely to distort / bow during the laser cutting process.
EN1090 Laser Cutting	Where a client requests compliance to EN1090 and no execution class is specified, the quotation will be based on Execution Class 2.
Welding / Fabrication All	Did you know as well as ISO9001:2015 we are also qualified to EN ISO3834 Part 2 and EN 15085 welding and rail welding standards. Unless specified by the customer at point of enquiry EU Origin cannot be guaranteed.
All	It is the customers responsibility to identify any discrepancy between material offered and their own requirements.
Quality	ISO:9001 approved.

Please contact us if you require any special tolerances, longer validity, or further clarification. We look forward to fulfilling your requirements.

Total engineering with endless possibilities
